

Washington State AV Subcommittee Report-out Template

Subcommittee	Licensing
Date of Meeting	4/18/19
Voting Members Present	

Instructions:

- 1) List subject of discussion
- 2) Write a detailed description of the recommendation, including the timeframe recommended for adoption, the agencies and stakeholders affected, and any fiscal implications. Identify potential challenges, including funding, regulation, legislation, education, etc. List recommended remedies to address identified challenges.
- 3) Check all required changes, and write in any that are not listed. Provide a brief explanation of the change needed
- 4) Check all impact areas affected and list recommendations for addressing identified impacts. Write in any impact areas not listed.
- 5) If the recommendation has been voted on, please list votes in favor and against. If no vote was taken, please note why.

1) Recommendation Challenges, and Mitigation Write a detailed description of the recommendation, including the timeframe recommended for adoption, the agencies and stakeholders affected, and any fiscal implications. Identify potential challenges, including funding, regulation, legislation, education, etc.	Amend RCW 46.37.480 – Television View, to allow for automated technology such as platooning.
	Current statute prohibits motor vehicles being equipped with any television viewer, screen, or other means of visually receiving a broadcast with moving images while a driver is operating a vehicle. The only current exceptions are for back-up cameras and law enforcement.
	Certain automated technologies, such as platooning, have the second vehicle in a platoon utilize a screen showing real-time roadway information and analysis from the first vehicle. This allows the second vehicle to closely follow the first vehicle while still receiving information about the conditions ahead.

<p>List recommended remedies to address identified challenges.</p>	<p>Recommended remedies: Amend RCW 46.37.480 to exempt the use of live video in connection with the operation of a platoon or other automated technology, which would be defined.</p> <p>** Should this be limited to platooning? Does other autonomous technology require this setup?</p> <p>**Is this question better suited to the Public Safety Subcommittee?</p>
<p>2) Requirements Identified Check all required changes, and write in any that are not listed. Provide a brief explanation of the change needed</p>	<p><input type="checkbox"/> Cost impact mitigation</p> <p>X Legislative change: Amend the RCW.</p> <p><input type="checkbox"/> Regulatory change</p> <p>X Other: Enforcement Change: Need to coordinate with Public Safety Subcommittee and WSP.</p>
<p>3) Identified implications/ impacts Check all impact areas affected and list recommendations</p>	<p><input type="checkbox"/> Infrastructure</p> <p>X Safety: Safety implications include Target Zero and distracted driving; while automated technology can save lives, if the exemption is too broad it could increase distracted driving.</p>

<p>for addressing identified impacts. Write in any impact areas not listed, and provide an explanation.</p>	
	<input type="checkbox"/> Insurance
	<input type="checkbox"/> Health and livability
	<input type="checkbox"/> Environmental impacts
	<input type="checkbox"/> Economic impact
	<input type="checkbox"/> Work force impact
	<input type="checkbox"/> Equitable access impact
<input type="checkbox"/> Other	
<p>5)Votes If the recommendation has been voted on,</p>	

please list votes in favor and against If no vote was taken, please note why.
